

Springwell School E- Safety **Filtering, Monitoring and Firewall Information.**

Springwell School Governing body regularly reviews the effectiveness of school filters and monitoring systems. They ensure that the leadership team and relevant staff are:

- Aware of and understand the systems in place. For Springwell this is the 'Securly' system. This system meets the key safeguarding requirements of Keeping Children Safe in Education, prevent, and IWF (Internet Watch Foundation). Web filtering and reporting is live 24 hours a day.
- Managed effectively. In Springwell's case Securly is 100% cloud managed with access delegated to DSL Staff.
- Aware of how to escalate concerns when identified. For Springwell alerts go directly to School DSL staff and the One IT Helpdesk. DSL's can contact the One IT Helpdesk at any time to clarify or provide extra details on the concern.
- Using communications with parents and carers to reinforce the importance of children being safe online. In Springwell we ...
- Aware of what teachers and staff are asking children to do online, including the sites they will be asked to access. In the case of Springwell web searches are restricted by our web filtering. Pupils are supported and monitored at all times whilst using the internet.
- Aware of who from the school or college (if anyone) their child is going to be interacting with online. In the case of Springwell School children will not interact with others online.
